Save Seeds

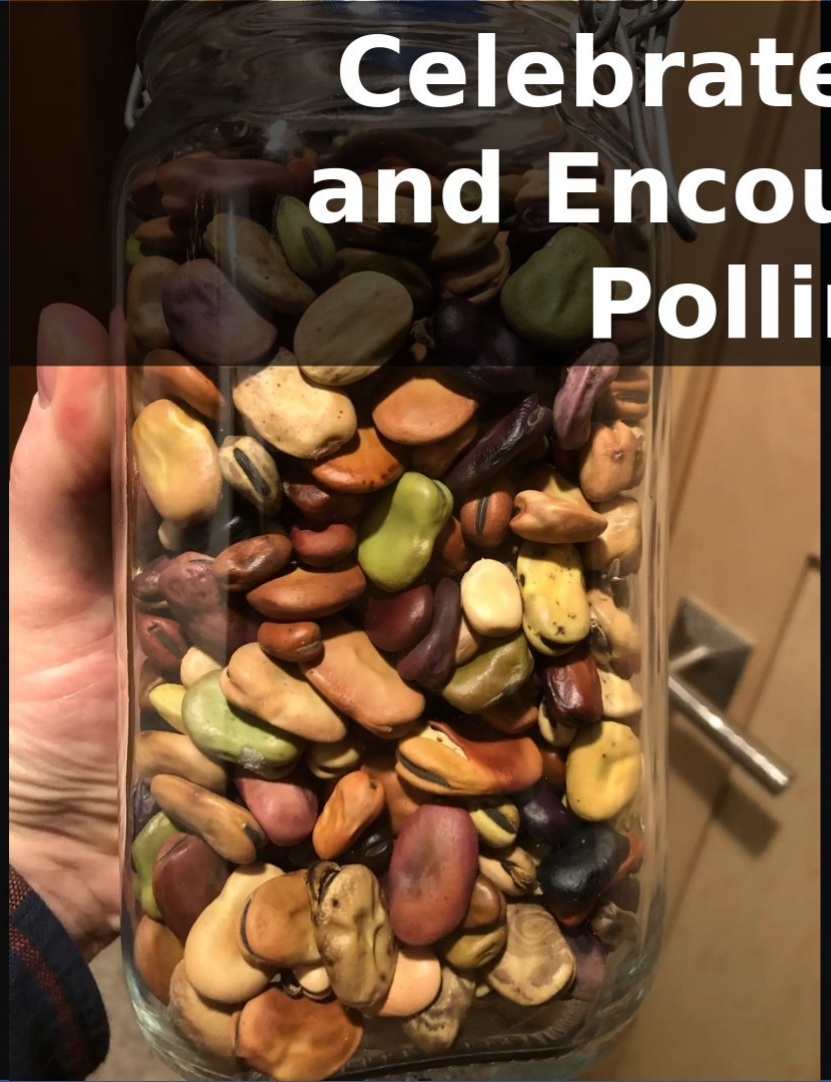

Celebrate Diversity and Encourage Cross Pollination

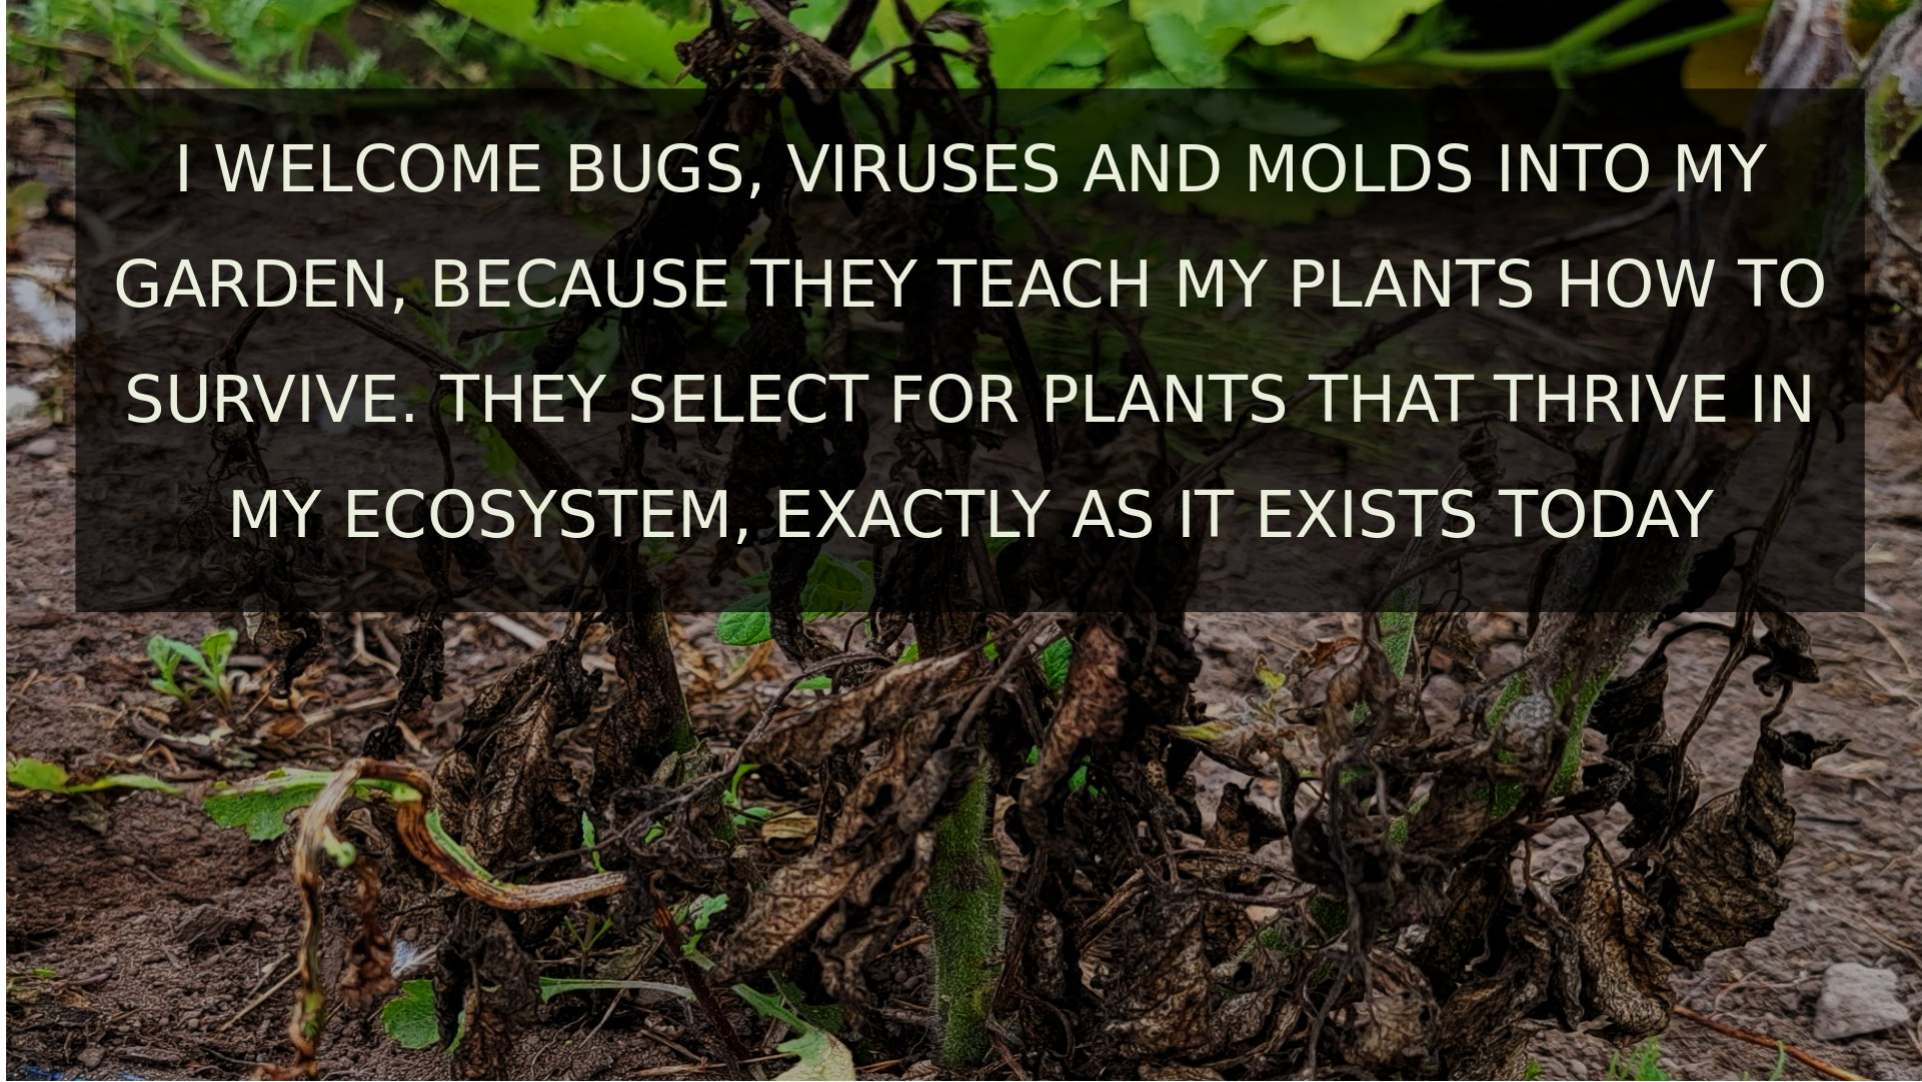

Encourage selection by the local eco-system

I WELCOME BUGS, VIRUSES AND MOLDS INTO MY GARDEN, BECAUSE THEY TEACH MY PLANTS HOW TO SURVIVE. THEY SELECT FOR PLANTS THAT THRIVE IN MY ECOSYSTEM, EXACTLY AS IT EXISTS TODAY

Select for characteristics that you value

Share your seeds

Seed Integrity

- Dry
- Cool (under 90F)
- Dark (out of direct sunlight)
- Freeze for 3-10 days to kill insects

Easy and Common

- Cucumbers, Squash, Melons
- Runner and Fava Beans
- Corn
- Melons
- Broccoli
- Radish

Food Security Through Biodiversity and Promiscuous Pollination
